

The Almost Perfect Day

If your oven breaks down on Thanksgiving morning this is what you should do.

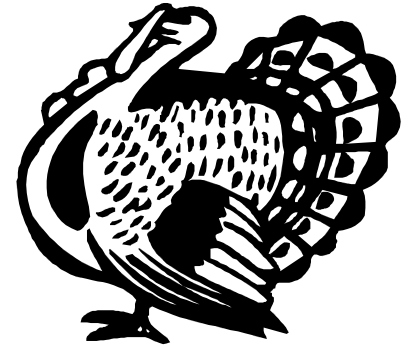

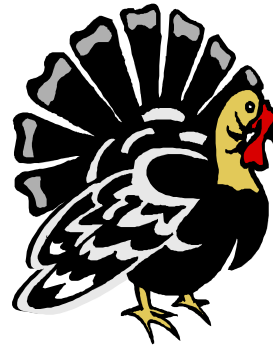

First you go to volcano and then you cut a wire.

Next you light a fire.

Then you get a fire breathing dragon.

After that and you put it on it's back.

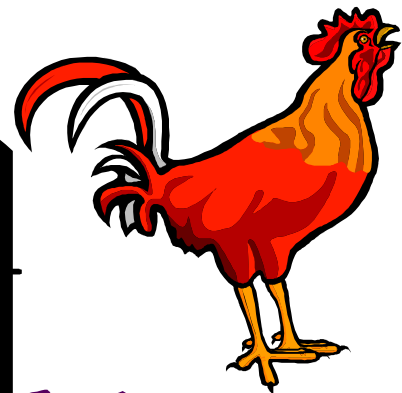

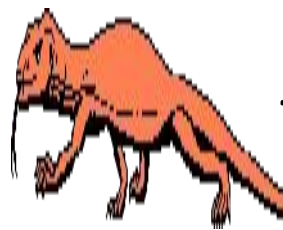

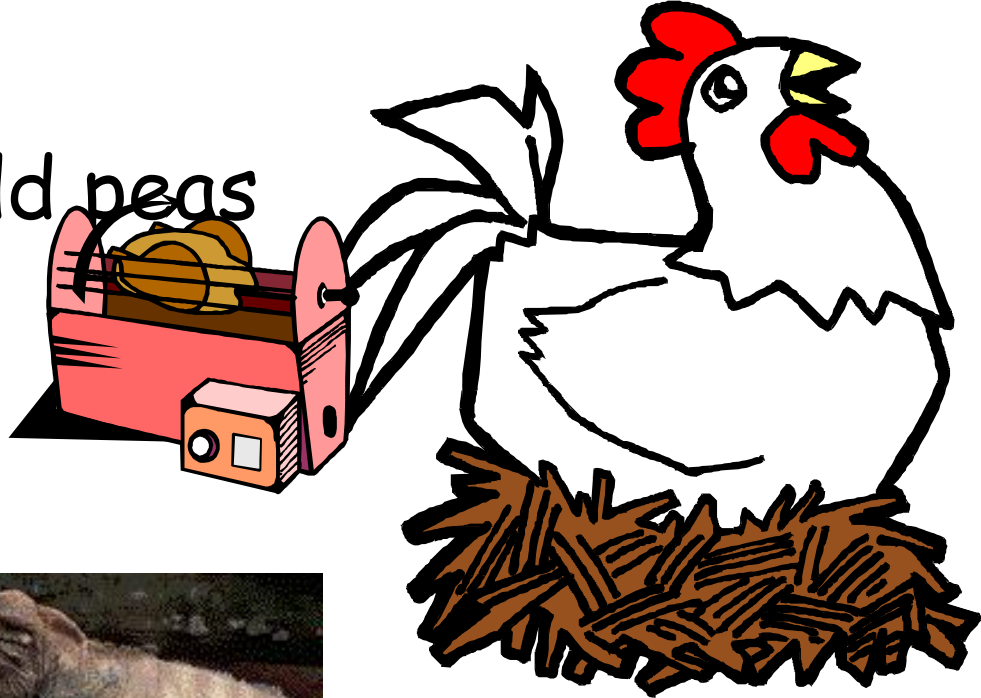

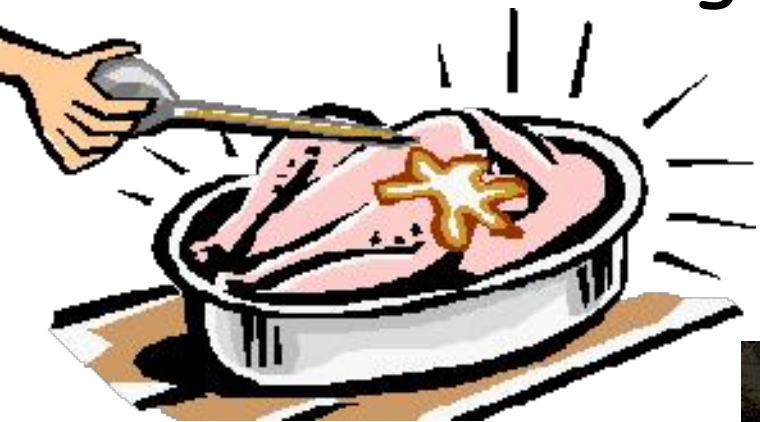

Finally blow fire.

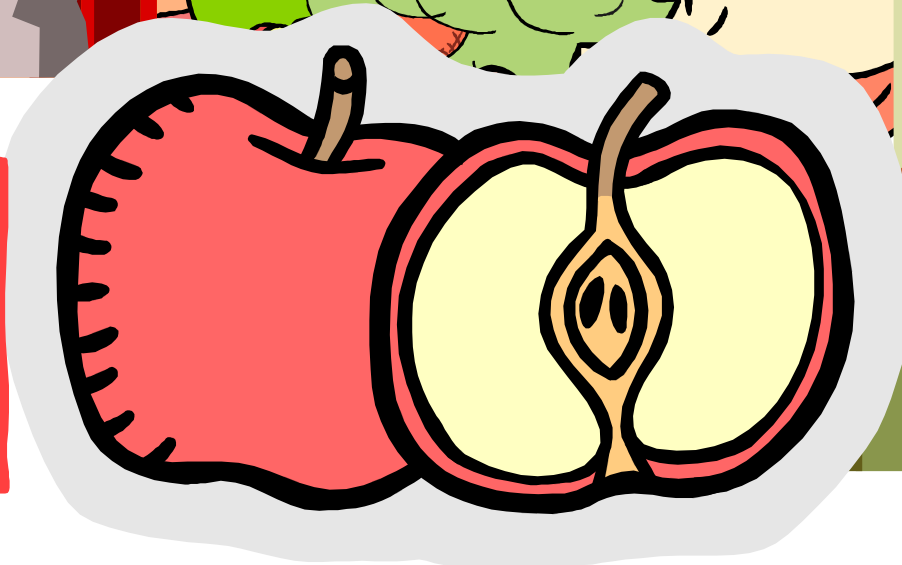

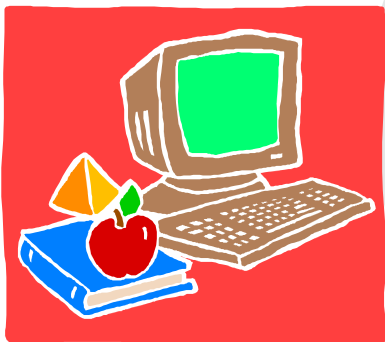

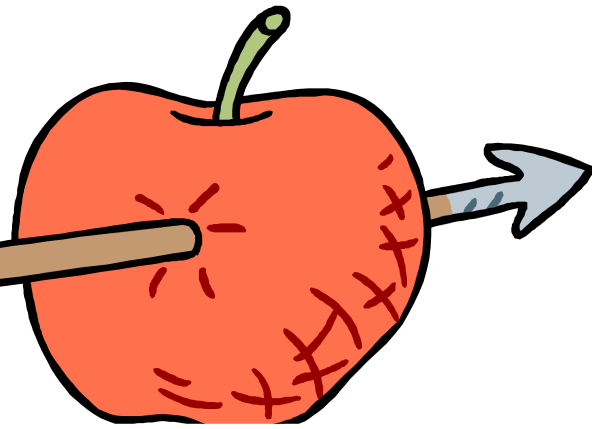

Make sure the temperature is 500,000,000 degrees and cook it for 1:00 hours.

Before cooking add peas

Serve the turkey with apple.

The turkey will smell good.

Look almost perfect.

And taste tar label.
