

Smell good

If your oven breaks down on Thanksgiving morning this is what you should do.

First you see Darth Vader.

Next borrow his Light saber.

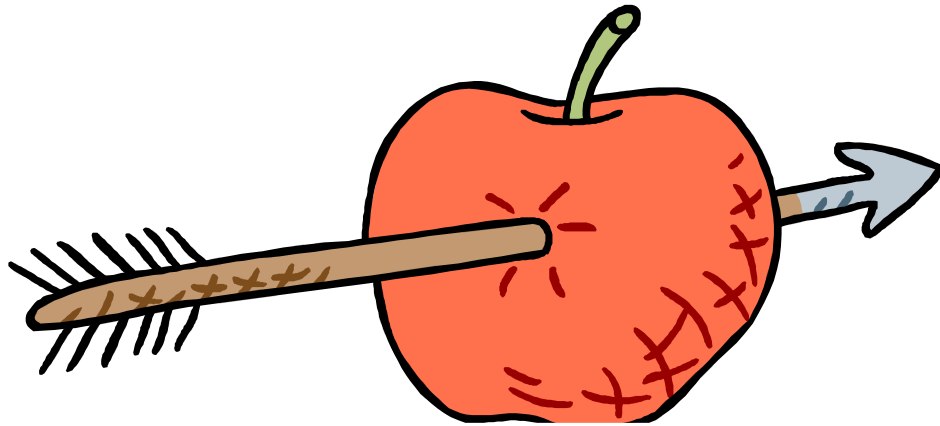

Then he will burin it.

After that eat with him.

Finally your fat.

Make sure the temperature is 10000 degrees and cook it for 100 hours.

Before cooking add salt and pepper.

Serve the turkey with stuffing and potatoes.

The turkey will smell delicious.
Look good and taste fabulous.
