

Thanksgiving

If your oven breaks down on Thanksgiving morning this is what you should do.

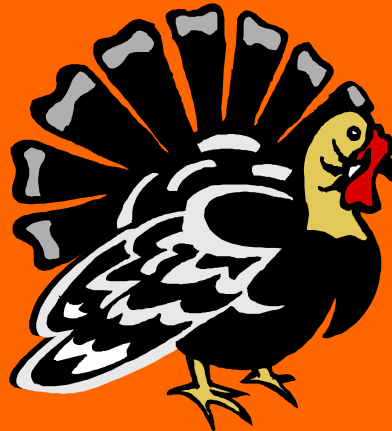

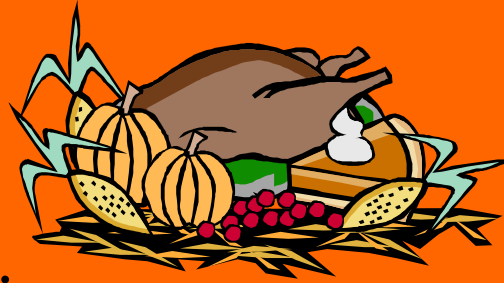

First find a human.

Next put him on the fire.

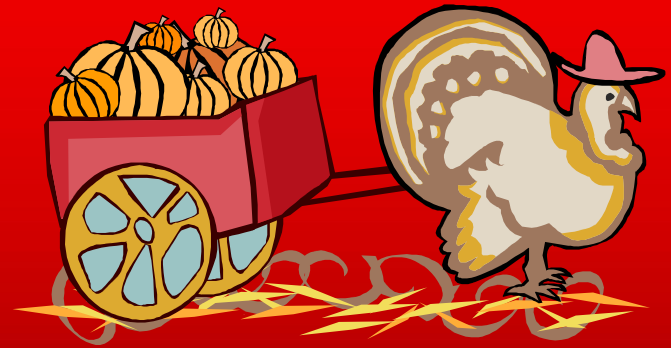

Then take him out.

After that put the turkey on him.

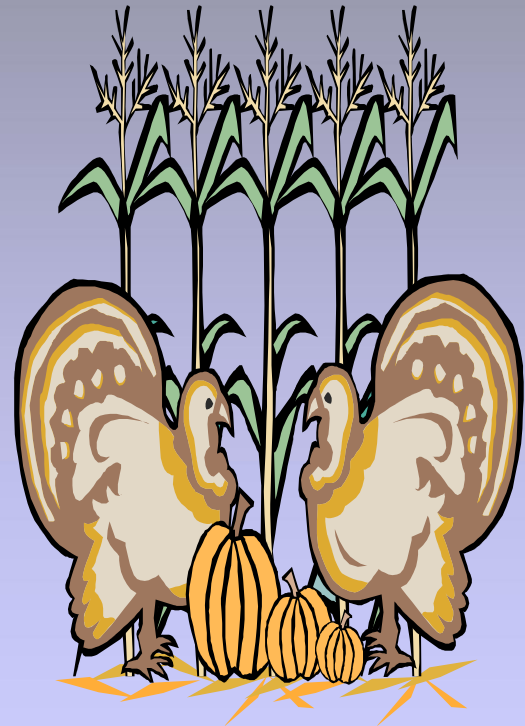

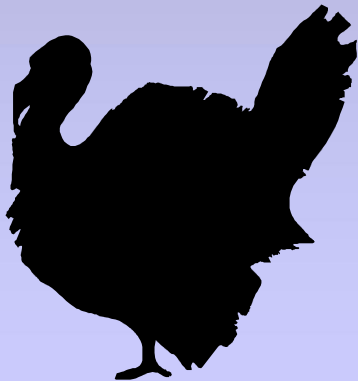

Finally take the turkey off of him.

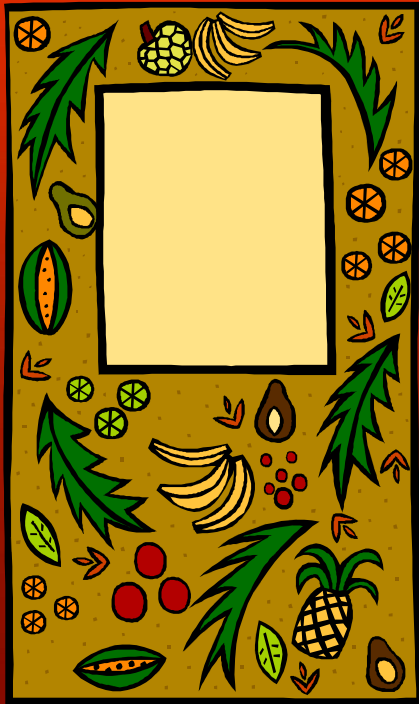

Make sure the temperature is 10,000
degrees and cook it for 100 hours.

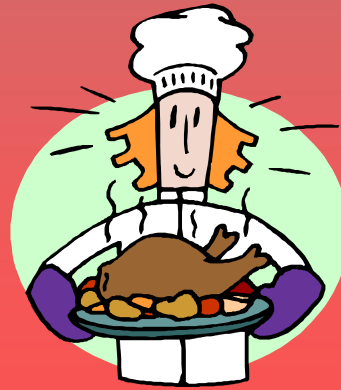

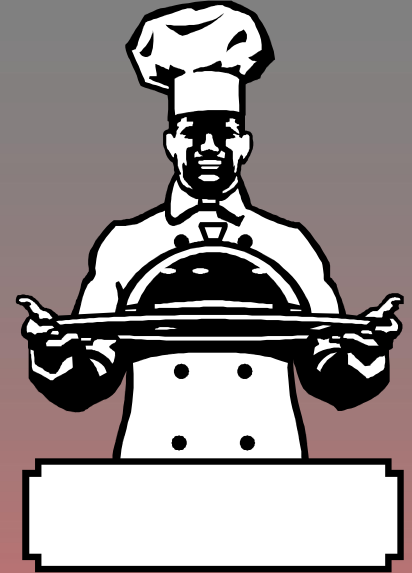

Before cooking add ice , and salt.

Serve the turkey with salad,
potatoes, ice cream, chocolate,
peanut butter, and all of the food.

The turkey will smell horrible ;
It will look yucky
and taste nasty.

the end
