

Get Turkeyed Up

If your oven breaks down on Thanksgiving morning this is what you should do.

First catch the turkey . But how do you do that. Ok this is how, you get turkeyed up.

Next you ride it home.

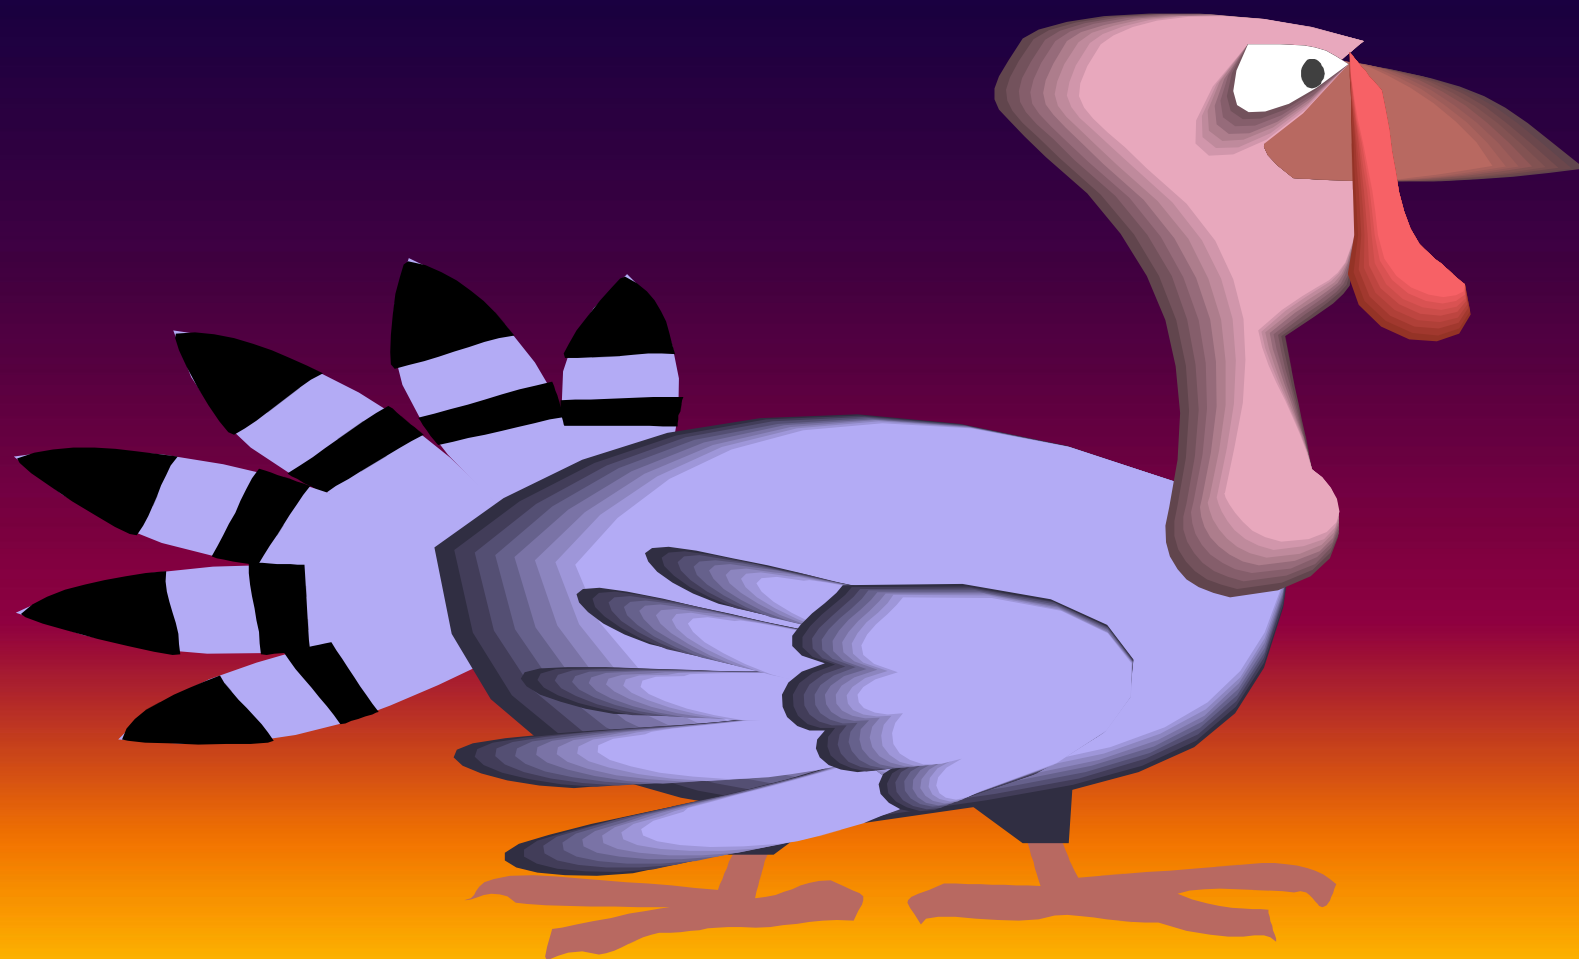

Then you have to cook it but your oven doesn't work. So you go to your computer and get a hammer and destroy it and then you roast it over the burning computer.

After that you bring it home.

Finally you have your turkey.

Make sure the temperature is 500,000,000,000 degrees and cook it for 50 hours.

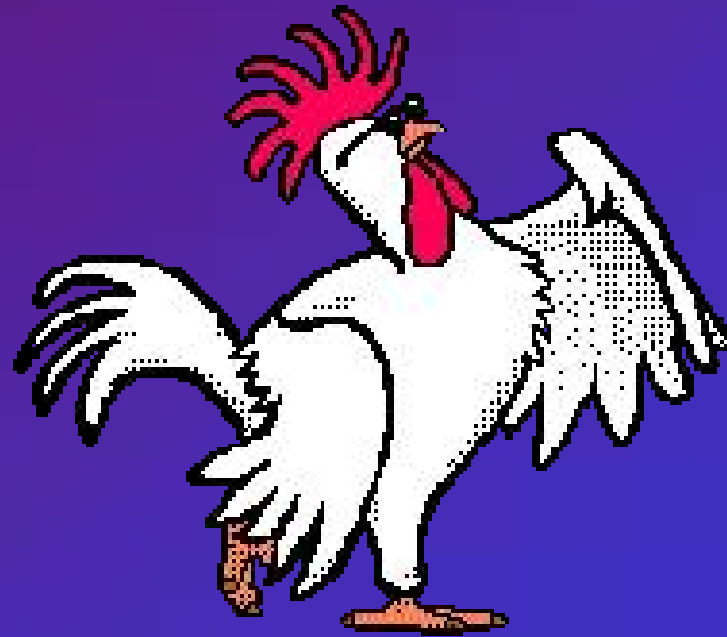

Before cooking add pepper peas and rice.

Serve the turkey with potatoes
jello and rice.

The turkey will smell goooooood.
Look sooper dooper good.
and taste extreme.

The End
