

The thanksgiving

If your oven breaks down on Thanksgiving morning this is what you should do.

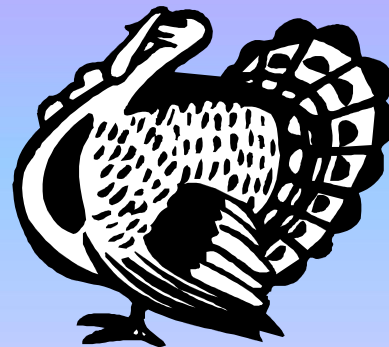

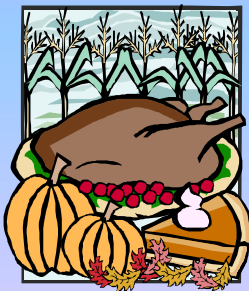

First turn your computer in to a rocket ship.

Next go to the moon and stick it close to the sun.

Then come out of ship.

After that go to the bathroom, go now because it's a long trip home.

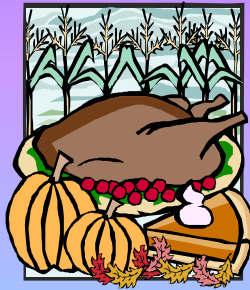

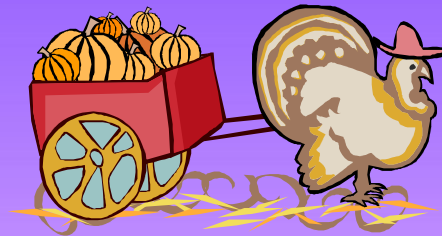

Finally cook it.

Make sure the temperature is 9,000 degrees and cook it for 40 hours.

Before cooking add salt, pepper and seasonings.

Serve the turkey with milk,
cookies and stuffing, salad
vegetables, pie and ice crème.

The turkey will smell delicious
Look nice and taste awesome.
