

Dragon Thanksgiving

If your oven breaks down on Thanksgiving morning this is what you should do.

First get a mine dragon

Next get its parents

Then make them blow fire on the turkey.

After that pike it up.

Finally get a water dragon.

Make sure the temperature is
1000000000000 degrees and cook it for 100
hours.

Before cooking add ice and water.

Serve the turkey with ice and a
popsicle.

The turkey will smell bade

Looks bad,

and taste horrible.
