

# Victor

If your oven breaks down on Thanksgiving morning this is what you should do.

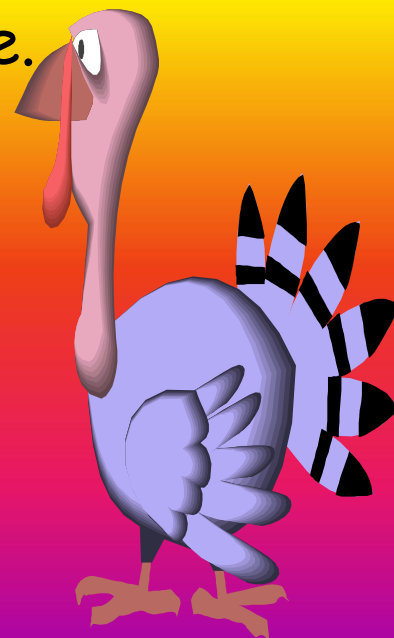

First get a dragon to blast fire out.

Next make sure he goes back.

Then take him back to china.

After that bring back the turkey to the house.

Finally put it on the table.

Make sure the temperature is 1,000 degrees and cook it for 30 hours.

Before cooking add ice cream and  
cake.

Serve the turkey with fish and brownies.

The turkey will smell good.

Look very good.

and taste good.

THE END
