

Great Horned Owl

It has yellow eyes. It has black, brown, gray and white feathers. It has a black beak. This bird is 18 to 25 inches tall.

It lives in forests, mountains, and parks. It builds it's nest in an old nest of a heron or a hawk in a tree.

This Great Horned Owl was hit by a car. Its eye was later removed and she was unable to return to the wild. She lays infertile Holiday eggs every Christmas season. She is a very large owl and loves to take baths in the hose and in her pond. She eats 1 rat 6 days per week. She lives at the Chattanooga Nature Center

It's eggs are white. It eats rats, birds, reptiles, fish and insects.

It lays 2 to 3 white eggs. The Great Horned Owl can be found in most of North America.
