

The Ruby Throated Hummingbird

This bird is 3 to 4 inches tall. It has a little bit red on it's neck. It has a long pointed bill. The ruby throated hummingbird is small.

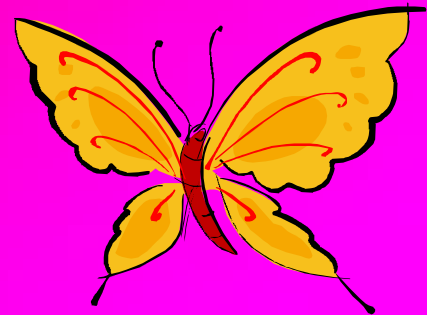

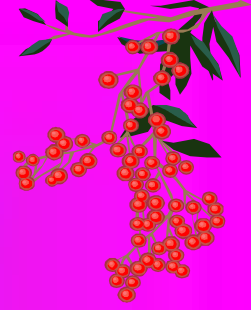

The ruby throated hummingbird lives in a flowering plant, gardens and woods. It's nest looks like a neat cup placed on a branch and decorated with lichens.

It eats flower nectar, aphids, insects and spiders. It lays two white eggs.

It makes a squeaky chip sound. It likes red flowers the best. It has a little bit green on it's head.
