

Macaroni Penguin

By: Marlis

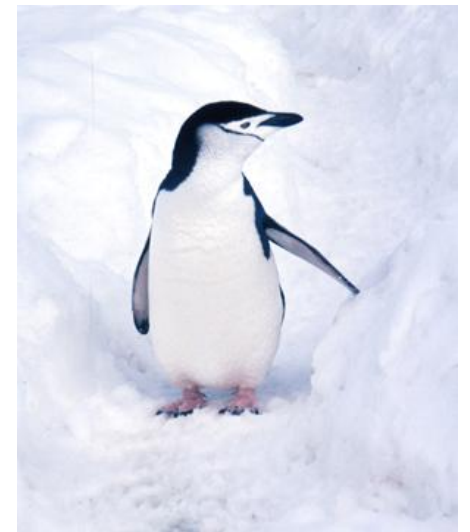

This bird is 70 cm tall. Macaroni penguins have some hair. Some of them find a place to put their babies and some make nests. Macaroni penguins hair color is yellow.

Macaroni penguins live in the south pole where they could catch fish. They catch fish in the beach where there are lots of rocks. Some penguins make nests. They breed on rocky slopes, beaches and amongst tussocks.

They eat lost antarctic krill but also a variety of fish. Macaroni penguins lay 2 eggs and they only keep one.

**Macaroni penguins are good swimmers.
They sled on there belly. They live near
the south pole.**
