

# The Blue Butterfly

A blue butterfly is blue and black.  
They have three body parts. And have two wings of the same.

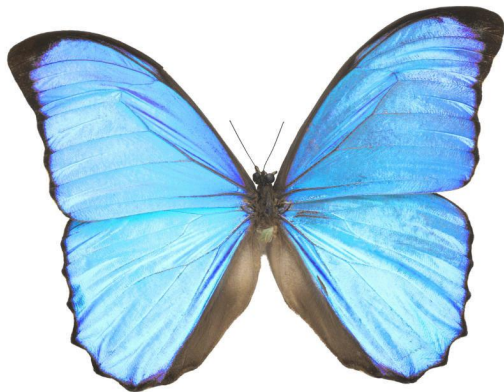

**blue** butterfly

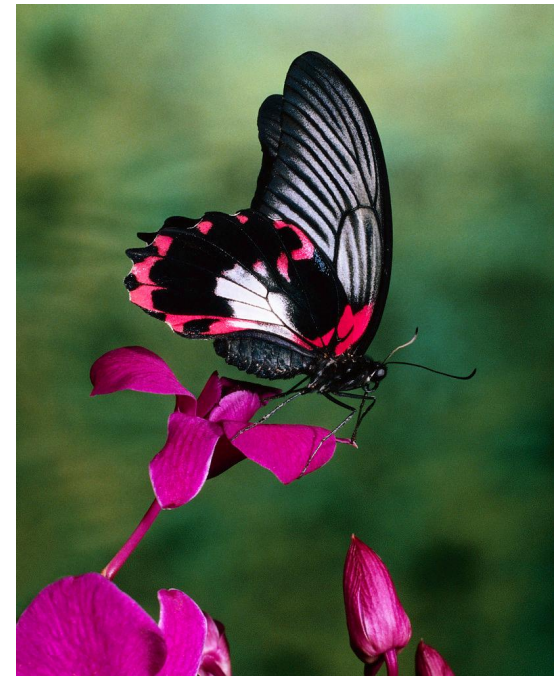

# butterflys

They live in the rainforest. They also live in the in the jungle. There are some at the zoo.

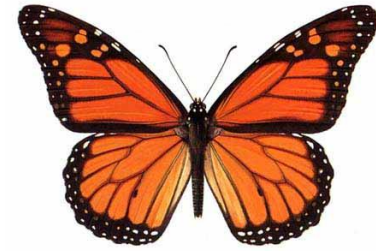

They eat nectar and leaves. And leave some for there babies. They only eat leaves when there caterpillars.

First they are little eggs. Then they hatch into a caterpillar. Next they are a cocoon. And last it is a blue butterfly.

It sucks up nectar. It lays eggs.  
And hatches in 5 days.
