

butterfly's Around The world

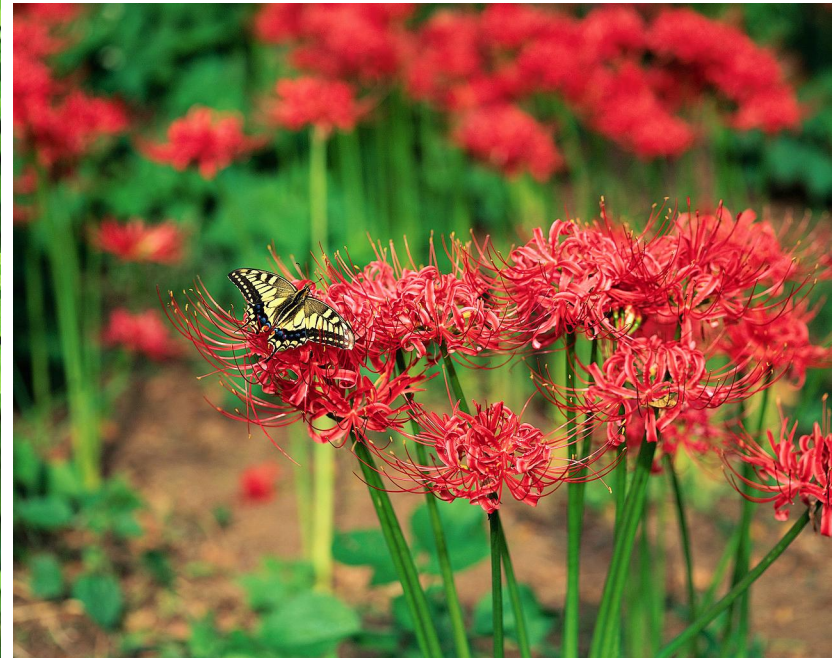

The blue butterfly has two wings on both sides. The blue butterfly is vary, vary pretty. And the blue butterfly has black and white on the tip of the wing.

The blue butterfly lives in the forest and the rain forest. Some butterfly's think they are birds.

It eats pollen and nectar and ant fluid and leaves. But not leaves that meat hoppers live on.

First it is an egg. Then it is a larva. After that it is a larger larva. then Chrysalis. Then it transforms into a pretty butterfly.

The blue butterfly smells with his antenna's.
