

# Ladybug

*They have spots. Some are red and orange. They have two eyes. They are small, oval shaped winged insects.*

**by Bianca**

*Some live in flowers and grass. Ladybugs live almost world wide but especially in forests, weed patches, and vacant lots full of weeds.*

*Ladybugs eat the bad bugs that destroy your plants. Ladybugs eat mostly aphids, scales and mites.*

*In the spring the adults lay up to three hundred eggs. The egg hatches in two to five days. The new hatched larvae feed on aphids for up to three weeks and then they enter the pupa stage.*

*When ladybugs fly, they beat their wings about 85 time per second. They like to fly. There are about 5.000 different kinds of ladybugs throughout the world.*
