

# Crickets

Crickets have antennae to see. Some crickets have 6 legs. Some crickets have red eyes.

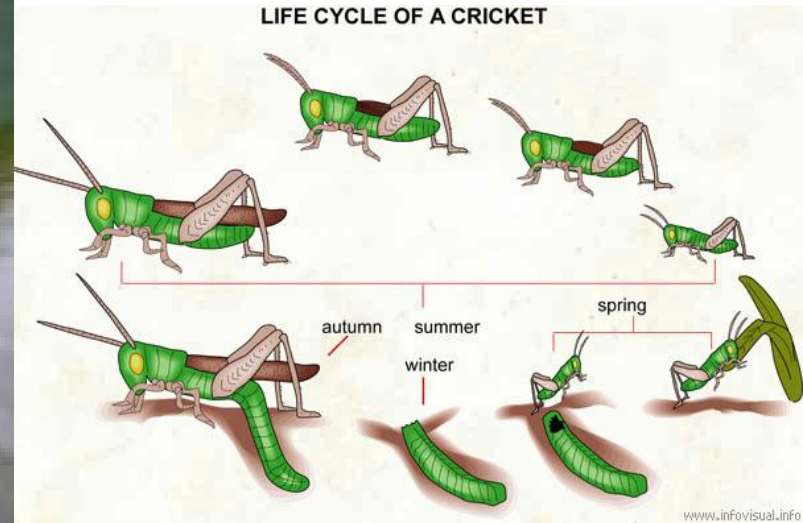

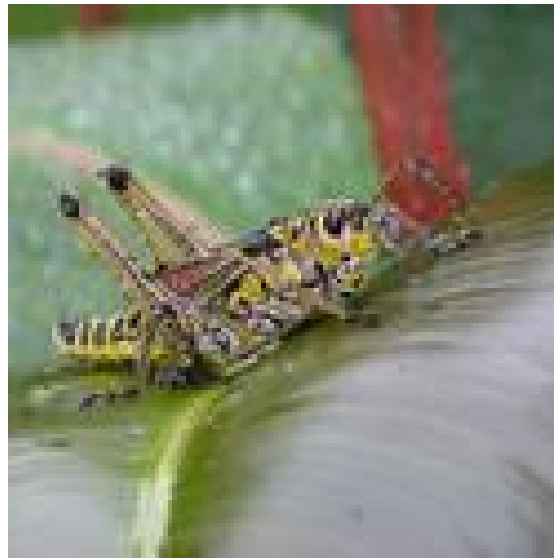

Some crickets live in schools. Some live in China. Even some crickets live in Mexico.

Crickets eat little pieces of papers. And some crickets eat trash. They even eat bread.

Crickets lay their eggs in the ground. And then it hatches. And the little crickets eat until it is big.

It lives in the grass. It eats paper.  
And it jumps high.
