

# firefly

It's body looks like in a oval. It's wings are black and yellow. It's head is black and yellow and a little red.

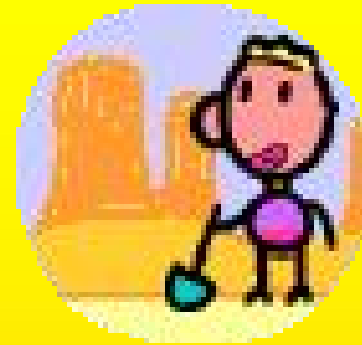

It lives in the united states most firefly larvae are found in rotting wood. And they live in the forest.

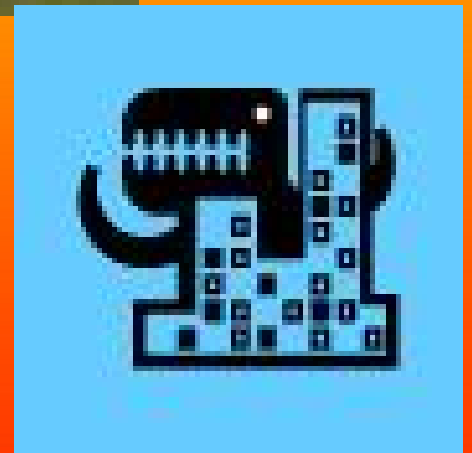

They eat meat  
and other firefly's

and they eat insects larvae, and snails.

It has to find it's food. It's really hard. It gets eating.

When the firefly opens its wings it glows in the dark the end.
