

broken oven

If your oven brakes down on Thanksgiving morning this is what you should do. First go to your neighbors house. Next tell your neighbors you need their oven. Then stay until they say yes. After that put your turkey in the oven. Finally taste it.

Make sure the temperature is 1,000,000,000 degrees and cook the turkey for 15 hours.

Before cooking add spice and salt.

Serve the turkey with cheese and onions.

The turkey will smell delicious and look good.
