

brokon

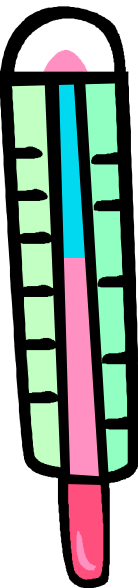

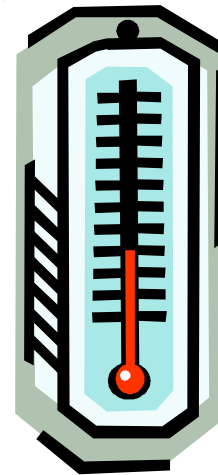

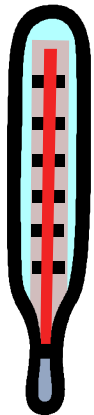

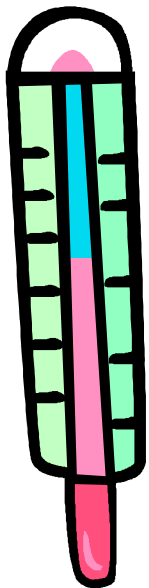

oven

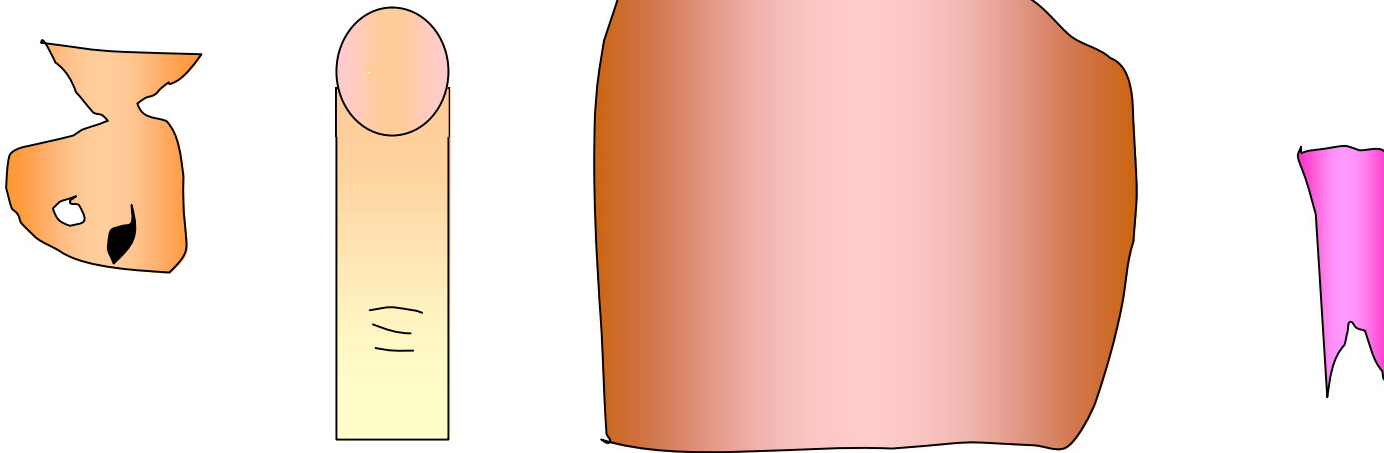

If your oven breaks down on Thanksgiving morning this is what you should do. First get your turkey and go out side and get a bowl of water. Next wait til its boiling put the turkey in it. Then go out side and get it. After that make sure it is golden brown. Finally serve it.

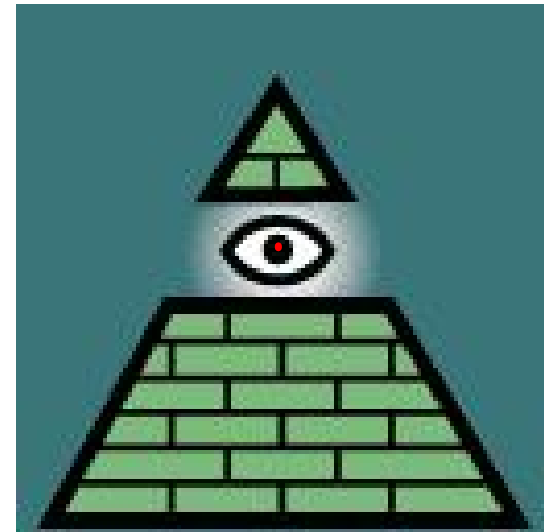

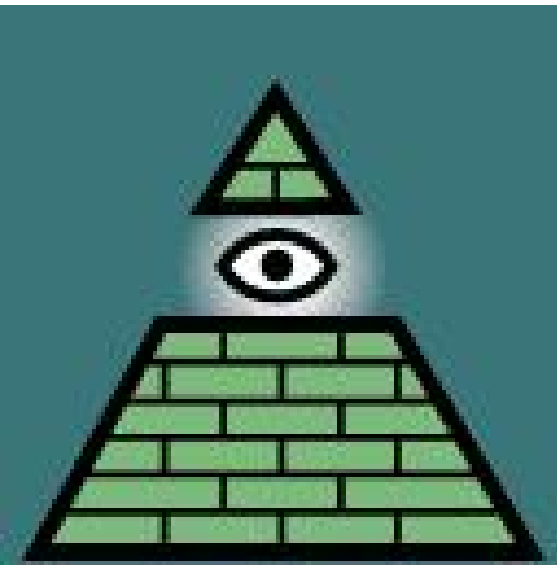

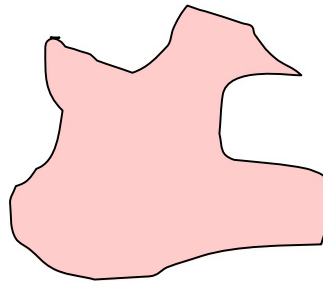

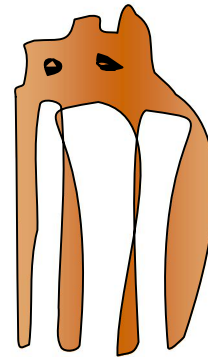

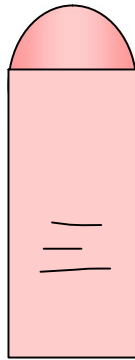

Make sure the temperature is 1.0000 degrees and cook turkey 10.999 hours.

Before cooking add pigs feet, fish slices, a hump of a camel, and a finger.

Serve the turkey with liver, toes,
an eye, and a daddy long leg.

The turkey will smell horrible, it looks ugly, it tastes nasty.
