

the best thanksgiving

If your oven breaks down this is what you should do. First go to your friends house, next ask if you can use there oven. Then put the turkey in the oven. Finally get in your car and put the turkey in the middle of the table.

Make sure the temperature is 1,000,000,000,000 degrees and cook the turkey for 80 hours.

Before cooking add pancakes inside. Serve the turkey with gravy and mash potatoes.

The turkey will smell good. Look delicious and taste great.
