

The Thanksgiving Feast on Thanksgiving.

If your oven breaks down on thanksgiving morning this is what you should do. First make a fire in the backyard. Next get a wild turkey. Then put wood under the fire. Then get a flat rock finally then the family can eat it.

Make sure the temperature is 10,000
Degrees and cook the turkey for 20 hours.

Before cooking add stuffing . Serve the turkey with potatoes, candy and chocolate.

Happy Thanksgiving

The turkey will smell delicious. It will look good. And taste really good.
