

Every year we celebrate thanksgiving at my grandpa's house then I said to my grandpa the oven is broken I didn't know what to do. then I said to my grandpa the oven is broken because you did not clean the oven I got some wood and rub the wood then

We went outside I was sure the temperature was 550 degrees we cooked the turkey for 5 hours. before cooking the turkey I added some stuff I served the turkey with soda and the turkey smelled good looked good and tasted good and thanksgiving was saved.
