

Komodo Dragon

I studied Komodo Dragons and I think they are the creepiest creatures on Earth. I think they are creepy because if they bite you, you will be dead in a week from suffering. Komodo Dragons have lived on islands for millions of years.

Komodo Dragons can smell dead animals from 7 miles (11 kilometers) away. Thick, hard scales cover their bodies. Komodo Dragons can be gray, brown, or green. Komodo Dragons are the heaviest lizards on Earth. I love Komodo Dragons because they are so creepy! By Caden
