

Bee

The bee has four wings on its back. It is black and yellow and has a stinger on its back. It only stings in danger.

It lives in small nests. The worker bee and the queen bee spend her whole life in the nest. The queen bee lays the eggs

It drinks juice from fruit and nectar from flowers and also honey.

It is $\frac{3}{4}$ inches long and it only stings
in danger and other bee's only are
one inch bigger than me.

Life cycle of life of a honey bee.
