

GOLIATH TIGERFISH

A tiger fish is scary!!!! If it bites you, you will die by suffering. It is deadly! It can eat fish. It is also known as the demon fish. It can rip a fish in half! It is scary. It can kill you! I like it! It is the largest member of the tiger fish clan. It is lightning quick and it likes turbulent waters. It doesn't fear the crocodile. It's known to attack humans. The Goliath Tiger fish is up to 5.0 feet and up to 154 pounds. It eats smaller crocodiles and is extremely creepy.
