

Great White Sharks

I studied Great White Sharks and I think they are the creepiest creatures on Earth. I think they are creepy because they have more than 3,000 teeth in their mouth. They can hunt seals, sea lions, dolphins, and even humans!

Female great whites give birth to between two and 10 pups at one time. Great White sharks can smell one drop of blood in 25 gal of water and can sense even tiny amounts of blood in the water up to 3 miles away! That is why Great Whites are the creepiest! By Harly
