

Polar bear

by Leonor

I studied the Polar bear. I think that they are the creepiest because they are dangerous for people. Polar bears live about 25 years. They weigh about 1600 pounds. They have soft fur it is like snow. They are strong swimmers.

They have been know to swim 60 miles. Polar bears have big paws and thick white fur. They live in the arctic ice. They eat shell fish. Young cubs live with their mothers for 28 months. By Leonor
