

Wolverines

I studied a Wolverines. I think they are creepy because they have painful jaws.

They are a bit of a vegetarian. Wolverines are omnivores!!! That means they eat plants and meat.

If you take there food they will get very mad at you, very mad!!!!

Wolverines can live from 12 - 14 years.

Wolverines have a cool look on their face. It is my number 1 favorite most creepiest creature ever!!!!
